

Weekly Report - Week 3

Student Name: Chi Sav Moeng

ID: e20220753

Date: January 6, 2026

1. CSS Refactoring

Objective: Centralized all styling into a single CSS file for better maintainability

Files Modified:

- `src/main/resources/static/css/main.css`

Key Changes:

- Moved all inline `<style>` tags from HTML templates to `main.css`
- Implemented comprehensive styling for:
 - Course cards and grids
 - Button variants (primary, secondary, danger, success, info)
 - Form styling and validation
 - Dashboard layouts
 - Responsive design for mobile devices

Code Example (main.css):

```
/* Course Grid Layout */
.course-grid {
  display: grid;
  grid-template-columns: repeat(auto-fill, minmax(350px, 1fr));
  gap: 20px;
}

/* Button Styles */
.btn-primary {
  background: #667eea;
  color: white;
  padding: 10px 20px;
  border: none;
  border-radius: 5px;
  cursor: pointer;
  transition: all 0.3s ease;
}

.btn-primary:hover {
  background: #5568d3;
```

```
transform: translateY(-2px);  
}
```

2. Guest Access & Search Features

Objective: Enable guest users to browse courses and implement search functionality

New Features Implemented:

A. Guest Access to Course Information

Files Modified:

- `src/main/java/edu/itc/enrollment_scheduling_system/config/SecurityConfig.java`
- `src/main/java/edu/itc/enrollment_scheduling_system/controller/AuthController.java`

Security Configuration Changes:

```
// Added public access to course endpoints  
.authorizeHttpRequests(auth -> auth  
    .requestMatchers("/", "/courses", "/courses/**", "/login", "/register",  
    "/css/**", "/js/**", "/images/**")  
    .permitAll()  
    .anyRequest().authenticated()  
)
```

AuthController New Methods:

```
@GetMapping("/")  
public String home() {  
    return "redirect:/courses";  
}  
  
@GetMapping("/courses")  
public String viewCourses(Model model, @RequestParam(required = false) String  
search, Authentication authentication) {  
    List<Course> allCourses = enrollmentService.getAllCourses();  
    if (search != null && !search.trim().isEmpty()) {  
        String searchLower = search.toLowerCase();  
        allCourses = allCourses.stream()  
            .filter(course -> (course.getName() != null &&  
course.getName().toLowerCase().contains(searchLower)) ||  
                (course.getCode() != null &&  
course.getCode().toLowerCase().contains(searchLower)))  
            .toList();  
    }  
}
```

```
// ... rest of the method
}
```

B. Search Functionality

Files Modified:

- `src/main/java/edu/itc/enrollment_scheduling_system/controller/AuthController.java`
- `src/main/java/edu/itc/enrollment_scheduling_system/controller/StudentController.java`
- `src/main/java/edu/itc/enrollment_scheduling_system/controller/TeacherController.java`

Search Implementation:

```
// Added to all course viewing controllers
@RequestParam(required = false) String search
if (search != null && !search.trim().isEmpty()) {
    String searchLower = search.toLowerCase();
    allCourses = allCourses.stream()
        .filter(course -> (course.getName() != null &&
            course.getName().toLowerCase().contains(searchLower)) ||
            (course.getCode() != null &&
            course.getCode().toLowerCase().contains(searchLower)))
        .toList();
}
```

C. Teacher Management System

Files Created/Modified:

- Created: `src/main/java/edu/itc/enrollment_scheduling_system/controller/TeacherController.java`
- Created: `src/main/resources/templates/teacher-dashboard.html`
- Created: `src/main/resources/templates/teacher-assignments.html`
- Modified: `src/main/java/edu/itc/enrollment_scheduling_system/repository/CourseRepository.java`
- Modified: `src/main/java/edu/itc/enrollment_scheduling_system/service/EnrollmentService.java`

TeacherController Code:

```
@Controller
@RequestMapping("/teacher")
public class TeacherController {
```

```

    @GetMapping("/dashboard")
    public String dashboard(Model model, Authentication authentication) {
        User teacher =
userRepository.findByUsername(authentication.getName()).orElse(null);
        if (teacher == null) {
            return "redirect:/login";
        }
        List<Course> taughtCourses =
enrollmentService.getCoursesByTeacher(teacher);
        model.addAttribute("teacher", teacher);
        model.addAttribute("courses", taughtCourses);
        return "teacher-dashboard";
    }

    @GetMapping("/assignments")
    public String viewAssignments(Model model, Authentication authentication) {
        User teacher =
userRepository.findByUsername(authentication.getName()).orElse(null);
        if (teacher == null) {
            return "redirect:/login";
        }
        List<Course> taughtCourses =
enrollmentService.getCoursesByTeacher(teacher);
        model.addAttribute("teacher", teacher);
        model.addAttribute("courses", taughtCourses);
        return "teacher-assignments";
    }
}

```

Repository Enhancement:

```

// CourseRepository.java
List<Course> findByTeacher(User teacher);

```

Service Enhancement:

```

// EnrollmentService.java
public Course getCourseById(Long id) {
    return courseRepository.findById(id).orElse(null);
}

public List<Course> getCoursesByTeacher(User teacher) {
    return courseRepository.findByTeacher(teacher);
}

```

D. New Templates Created

Files Created:

- `src/main/resources/templates/course-detail.html` - Detailed course information page
- `src/main/resources/templates/course-students.html` - List of enrolled students
- `src/main/resources/templates/course-teachers.html` - Course instructor information

Template Example (course-detail.html):

```
<!DOCTYPE html>
<html xmlns:th="http://www.thymeleaf.org">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title th:text="${course.name} + ' - Course Details'">Course Details</title>
  <link rel="stylesheet" th:href="@{/css/main.css}">
</head>
<body>
  <div class="container">
    <div class="detail-container">
      <h1 th:text="${course.name}">Course Name</h1>
      <div class="detail-course-info">
        <div class="info-item">
          <div class="info-label">Course Code:</div>
          <div class="info-value" th:text="${course.code}">CODE</div>
        </div>
        <!-- More course details -->
      </div>
    </div>
  </div>
</body>
</html>
```

3. Summary of Accomplishments

Features Implemented:

1. ☒ **CSS Centralization** - Moved all styles to `main.css` for better maintainability
2. ☒ **Guest Course Browsing** - Public access to course listings without login
3. ☒ **Search Functionality** - Course search by name and code across all user types
4. ☒ **Teacher Dashboard** - Dedicated interface for teachers to manage their courses
5. ☒ **Course Detail Pages** - Comprehensive course information for all users
6. ☒ **Teacher Assignment Management** - Tools for teachers to handle course assignments
